

ARender is the content viewer that accelerates business productivity, bringing collaboration and mobility to everyone through its unique, secure User eXperience

Technical Capabilities

100% Web : View any content from any application, from any device, anywhere

Streams content securely; open massive or multiple documents instantly

Reduce waiting times because waiting costs

Ergonomic User Interface, Technical Reporting

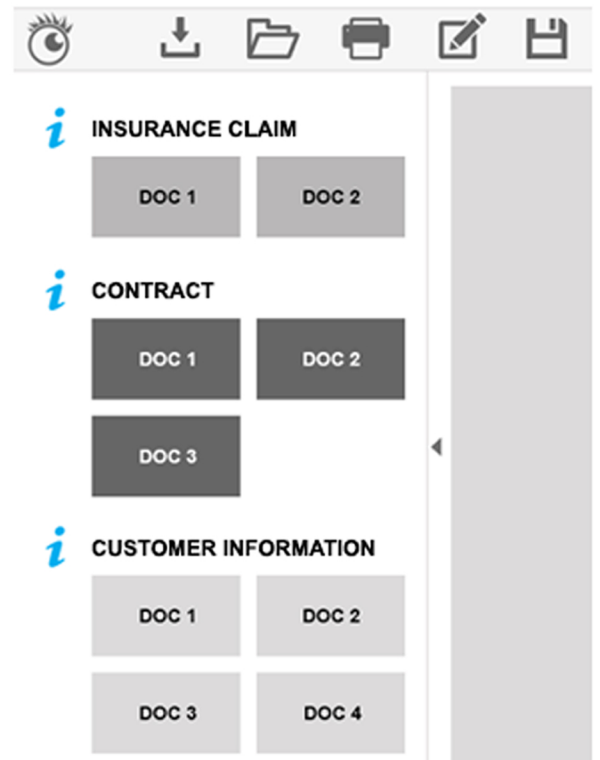

Key Benefits

Keep track of all business decisions by precisely annotating contents

Offer context-aware multi-content viewing to ease complex case processing

Collaborate efficiently with annotations, redaction, split & merge, compare

Conform to regulations with GDPR, Antifraud & Track-records on client usage

After evaluating and testing many options, ARender was the clear best choice to integrate with Trial Interactive: simple to deploy and use, fast renditions of complex documents, easy navigation, and the ability to compare documents, all which will save our users valuable time.

Michael Smyth, Division President of TransPerfect Life Sciences

About Arondor

Created in 2002 by Content Management experts, Arondor proposes business content solutions which cover the entire document lifecycle. Thanks to our great track record, we double in size and revenue each 3 years.

In 2010, several of our important clients asked us to develop unique software solutions for their applications which hadn't been sufficiently addressed by the competition. As a result, we at Arondor developed our own solutions:

- ARender, our universal content viewer
- Fast2, our document-oriented ETL and Migration Framework
- Flower, our unified workflow and content user interface.

The Products Business Unit was created in 2015 to keep developing our three software offerings, as well as integration and business development. This team is made up of young and dynamic talents driven by innovation and teamwork. It includes the R&D, Support, Professional Services, Sales & Channel teams to provide the best guidance to our customers and partners.
